

Process intensification

iCELLis™ technology

Scalable

Disposable

High-cell-density

By providing innovative and efficient solutions for process intensification, Artelis has become the privileged partner of major leading pharmaceutical companies.

Artelis' solution to your protein and virus production challenges

Artelis is developing iCELLis™, a scalable and disposable high-cell-density bioreactor for the production of proteins and viruses.

iCELLis™ allows a 20- to 100- fold increase in **volumetric productivity**

- **Manufacturing scales** are dramatically reduced
- **Capital and investment costs** are dramatically decreased

Rely on us to adapt iCELLis™ technology to your specific process needs

We watch your cells
